DETAILED ACTION

Allowable Subject Matter

Claims 45-58 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art does not teach or would not have rendered obvious an apparatus for coherent light despeckling, such as claimed in claims 45-58, the apparatus having: a phase shifter (Phase Array of Figs. 2-5, 7-10) to modulate the phase of coherent light including low-frequency pattern content that is not perceived by the human eye; and a controller (Controller of Figs. 2-5, 7-10) coupled to the phase shifter to remove the low-frequency pattern content from the coherent light.

The closest prior art, Hargis et al (US 6,154,259) and Fig. 1 (Applicants admitted prior art) disclosed conventional system for coherent light despeckling, either singularly or in combination, fail to anticipate or render obvious the present invention as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
